Capital Adequacy Ratio

Consolidated

We calculate the consolidated BIS capital adequacy ratio in line with provisions of Article 52-25 of the Banking Act and on the basis of calculation formula prescribed under the criteria for judging whether a bank holding company and its subsidiaries' capital adequacy ratios are appropriate in light of assets held (the Financial Services Agency 2006 Notification No. 20, hereinafter referred to as the "FSA Bank Holding Company Capital Adequacy Notification").

As of the end of September 2022, we used the Advanced Internal Ratings-Based (IRB) Approach for the calculation of credit risk-weighted assets, the Advanced Measurement Approach for the calculation of operational risk, and market risk regulations.

Scope of Consolidation

Consolidated

(1) There is no difference between companies belonging to the group of companies subject to the consolidated BIS capital adequacy ratio as prescribed by the FSA Bank Holding Company Capital Adequacy Notification, Article 3 (hereinafter referred to as the "SuMi TRUST Holdings Group") and the companies included in the scope of accounting consolidation.

2. Purchased receivables for retail (dilution risk and originator risk of loan participation) are not applicable.

The certain procedure is not part of the audit of the consolidated financial statements or the audit of the internal control over the financial reporting but was conducted by the external auditor on the agreed-upon scope and under agreed-upon examination procedures, and is a report of the results presented to us. It thus does not represent an opinion or conclusion by the external auditor regarding the Basel III leverage ratio itself or parts of internal control over the procedure to calculate the ratio.

The key drivers of material changes observed from the end of the previous interim reporting period to the end of the current interim reporting period

The decrease in leverage ratio is mainly due to the increase in total exposures resulting from increase in loans and other assets.

Qualitative Disclosure Items for the Liquidity Coverage Ratio (LCR) on a consolidated basis

(1) Items concerning fluctuations in the LCR over time

Our consolidated LCR has trended steadily for the most part in the past two years.

(2) Items concerning evaluation of the LCR level

Our consolidated LCR satisfies the regulated level (100%) as required under liquidity ratio regulations and the actual LCR is roughly in line with our initial forecast. Up ahead, we do not expect our LCR to deviate significantly from the current level.

(3) Items concerning the composition of totals for eligible high-quality liquid assets

The majority of our eligible high-quality liquid assets are reserve deposit held at central banks and sovereign bonds. There have been no material fluctuations in the composition of currencies, their types and locations. Furthermore, there has been no material difference between totals for eligible high-quality liquid assets and net cash outflows in major currencies.

(4) Other items concerning LCR

We apply neither the “treatment for qualifying operational deposit” nor the “additional collateral required to market valuation changes based on the scenario approach.”

Furthermore, taking account of the impact to LCR, we are using month-end data in lieu of daily data for the consolidated subsidiary companies of minor importance with practical restrictions.

Qualitative Disclosure Items for the Net Stable Funding Ratio (NSFR) on a consolidated basis**(1) Items concerning fluctuations in the consolidated NSFR over time**

Our consolidated NSFR has remained stable mainly due to our predetermined funding policy on the sticky money.

(2) Items concerning special provisions for interdependent assets and liabilities

The “Special provisions for interdependent assets and liabilities” stipulated in the items under Article 99 of the Financial Services Agency Notification on Liquidity Ratio are not applied on a consolidated basis.

(3) Other items concerning consolidated NSFR

Our consolidated NSFR satisfies the regulated level (100%), and we do not expect NSFR to deviate significantly from the current level in the future.

Currently, the entire amount of funding from retail and small business customers is recorded as “less stable deposits.”
