Nikko Asset Management Joins Net Zero Asset Managers initiative

Nikko Asset Management Co., Ltd. (Nikko AM) is proud to announce that it has joined the <u>Net Zero Asset Managers initiative</u> – a global collaboration among asset managers to achieve net zero greenhouse gas emissions across their portfolios by 2050 in an effort to limit the rise in average temperatures to 1.5 degrees Celsius, compared to pre-industrial revolution levels. The Net Zero Asset Managers initiative was founded in December 2020, and as of 1 November 2021 consisted of a total of 220 asset managers with a combined USD57.4 trillion¹ in assets under management.

Climate change is one of the biggest challenges facing the international community, and Nikko AM is addressing this issue as an essential element of the firm's fiduciary responsibility as manager of clients' assets.

Nikko AM Global Head of Investment and CIO Hiroki Tsujimura commented, "Sustainable investment is at the core of our business and we believe it is inherent to long-term value creation. We are excited to make a commitment to achieve global net zero emissions by 2050 and honoured to be part of this growing group of global asset managers. While we acknowledge there are many hurdles and challenges, by collaborating with our clients, investee companies, and other initiative members we can accelerate progress to meet this ambitious goal."

Nikko AM has been actively engaging with investee companies to support their ESG activities, including those addressing climate change issues. The firm also supports other global efforts addressing climate change, such as the Paris Agreement and the United Nations Sustainable Development Goals (SDGs), and in 2018 became the first asset manager headquartered in Asia² to support all four areas under The Investor Agenda, a platform that aggregates investor initiatives on climate change. Nikko AM is also actively involved in other international collaborations such as Climate Action 100+, which is based on collaborative engagement with companies to secure clear commitments to reduce emissions, improve governance and enhance disclosure of financial information on climate risks in accordance with the Task Force on Climate-related Financial Disclosures (TCFD).
